

Alphabet Bingo

Name _____

HOW TO PLAY

- The teacher slowly calls out one letter at a time, and students mark the corresponding letter with a circle. The first student to get a line of 5 in a row is the winner.
- Put a circle in the middle space at the start of the game. This is a "free space."
- Have students find the letter that is missing from the board before the game begins.
- Have them write this letter in the middle space, and then begin the game.
- When using the "Mixed" boards, call out 'big' or 'small' before each letter.
- A blank game board is included. Students can fill in the board with their own letters in random order.
- When the game is over, do an extension activity: cut up the letters and put them in alphabetical order.
