Frogs

Written by Paul Reeder

What Are Frogs?

Frogs are animals.

Frogs can live on the land or in the water.

Where Do Frogs Live?

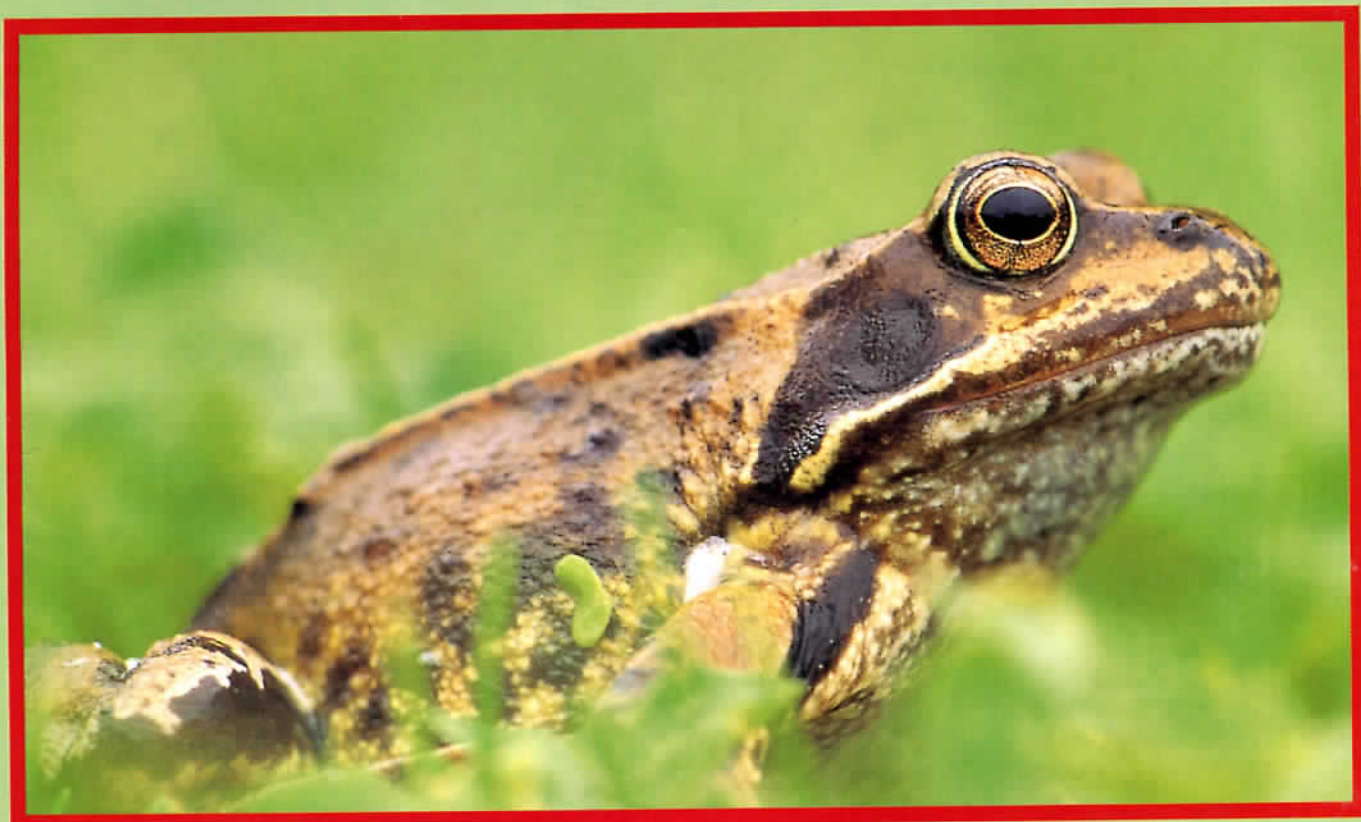

Frogs live all over the world, but not in Antarctica.

Some frogs live in the water.

Some frogs live in trees or under rocks.

What Do Frogs Look Like?

Most frogs are green or brown.

Frogs have short front legs.
They use them for sitting up.

short front legs

Frogs have flat heads and no necks.

Frogs have long back legs.

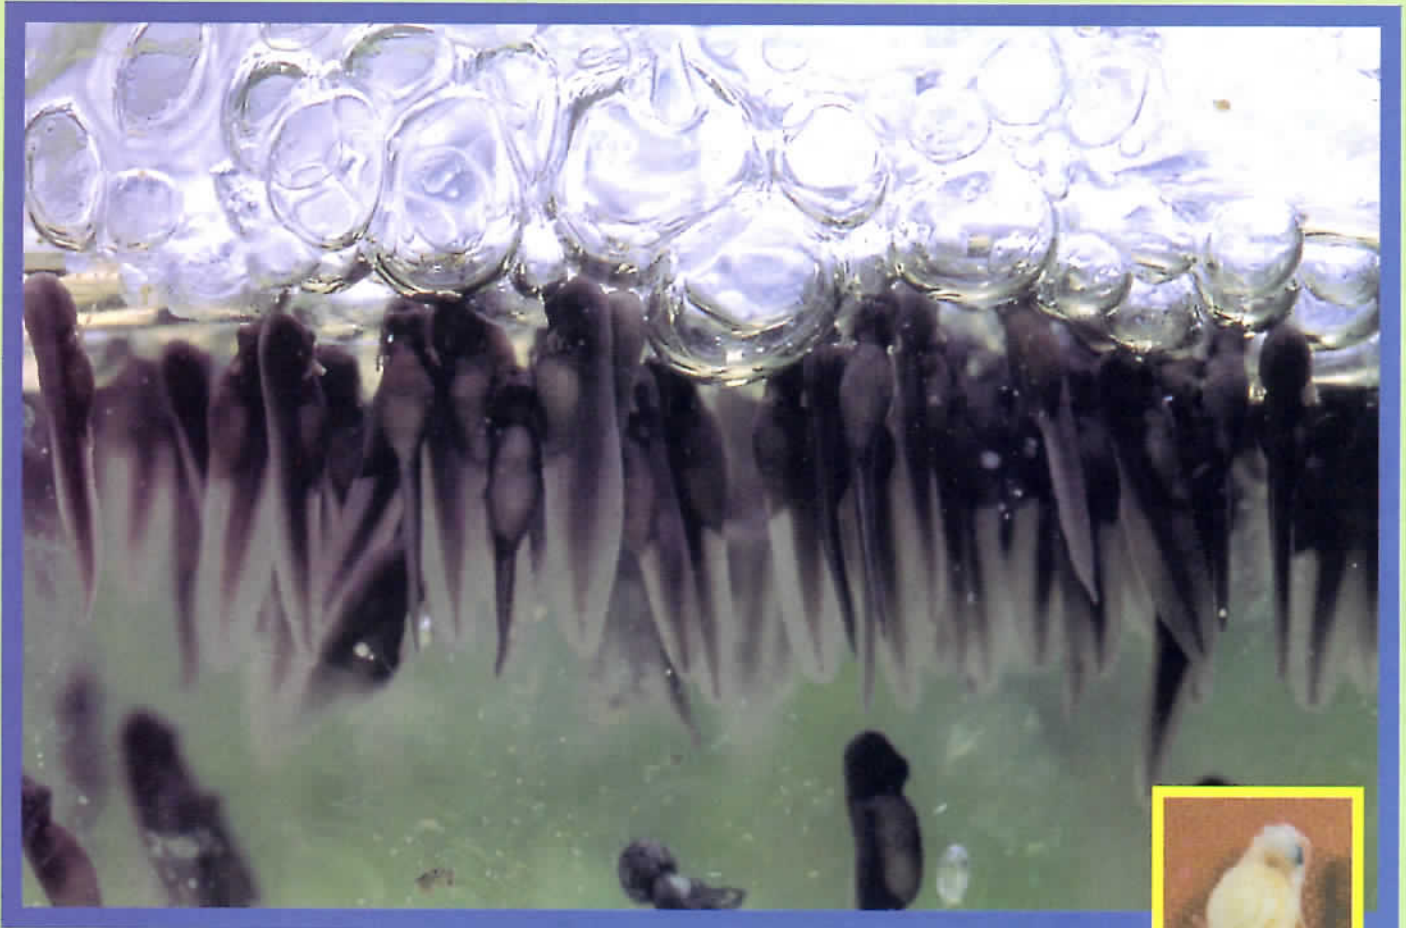

They use them for jumping and swimming.

Frogs have webbed feet. They use them for swimming.

Tadpoles to Frogs

- 1 Frogs hatch from eggs.
Baby frogs are called tadpoles or polliwogs.

Tadpoles have a round body and head.
Tadpoles have a long tail.

Tadpoles change into frogs.
Most tadpoles take two weeks
to change into frogs.

- 2 The tadpole's tail gets bigger.
This helps the tadpole swim to get food.

3 The tadpole's legs begin to grow.

4 The tadpole's tail is part of the new frog's body.

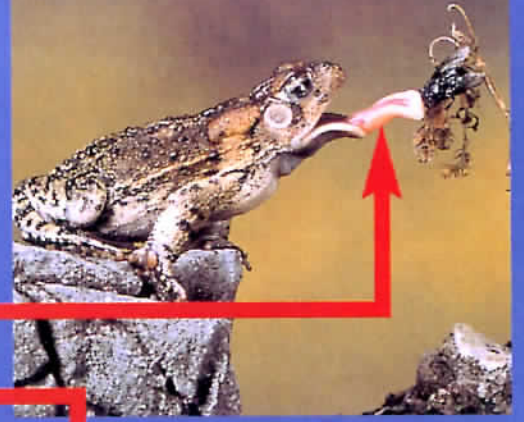

What Frogs Eat

Frogs eat flies and insects.

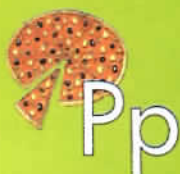

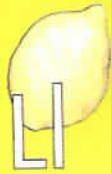

Some frogs catch flies and insects with their long tongues.

Some frogs have big mouths.

Bullfrog

Written by Monique Martin

Illustrated by Jim Storey

Bullfrog, Bullfrog,
Let's play leapfrog.

Let's play leapfrog,
Over the black dog.

Over the black dog,
And over a big log.

Over a big log,
And down to the brown bog.

Bullfrog, Bullfrog,
Let's play leapfrog!
