

Class: _____ Name: _____

Score: ____ /15

[1-6] Read the passage again. Choose the correct words.

- 1 The trunk moves the water to the (branches / sky).
- 2 The roots help the tree grow (deep / tall).
- 3 Then the leaves use water, air, and (ground / sunlight) to make food.
- 4 They help cactuses (live / keep) water inside.
- 5 The roots (collect / grow) water in the ground.
- 6 Cactuses have roots, (types / stems), and spines.

[7-8] Go back to the passages. Complete the sentences.

- 7 The leaves make food from water, air, and sunlight.
→ The leaves _____ water, air, and sunlight to make food.
- 8 Cactuses are many sizes and shapes.
→ Cactuses are tall, short, _____, or thin.

[9-12] Read and choose True or False.

The trunk moves the water to the branches. And the branches move the water to the leaves.

Then the leaves use water, air, and sunlight to make food. The food helps the whole tree grow strong and tall. But it all starts at the roots.

- | | | |
|-----------|--|--------------|
| 9 | The trunk moves air to the branches. | True / False |
| 10 | The branches move water to the leaves. | True / False |
| 11 | The leaves use water, air, and sunlight. | True / False |
| 12 | The food helps the tree grow thin. | True / False |

[13-15] Read and choose the correct answers.

Cactuses have roots, stems, and spines. They all help cactuses keep water inside. So cactuses can live and grow in the desert.

Cactus roots are long, and some roots grow deep. The roots collect water in the ground. Cactuses can keep water in their stems for a long time.

- 13** Cactuses can keep water in their _____ for a long time.
- Ⓐ spines
 - Ⓑ stems
- 14** Where can cactuses live?
- Ⓐ in the forest
 - Ⓑ in the desert
- 15** What is true about cactuses?
- Ⓐ They have long roots.
 - Ⓑ They have short roots.
